Energy Florida, Inc. announces new International Partnership with Innovatiespotter

CAPE CANAVERAL, FLORIDA – October 5, 2017: Energy Florida announces it has entered into an international agreement with Innovatiespotter, whereby both business organizations will provide consulting services related to international innovative business opportunities.

Innovatiespotter located in Groningen, The Netherlands, has the professional expertise to assist American business to find and convene market access to any innovative company among its 2 million businesses within The Netherlands.

Gea Vellinga, Founder and CEO of Innovatiespotter said, “We are excited to collaborate with Energy Florida and develop our business relationship further. We look forward to work with Energy Florida to use our experience and expertise of our developed search technology to help innovative companies succeed abroad too. Tapping into each other’s vast networks in the technology sector is one of the great advantages of this collaboration we really see a huge potential in. We see a great future ahead for this collaboration.”

Mike Aller, Executive Director of Energy Florida, said, “We now have access to the Netherlands market by teaming up with the Innovatiespotter team. I look forward to working with Innovatiespotter to support the development of business opportunities and collaboration for American businesses looking to expand into the Netherlands market with their goods, products and services. We firmly believe in the power of building bridges to the world.”

About Innovatiespotter:

The Innovatiespotter offers an innovative solution to identifying companies in the area of innovation and innovative technology areas. The search approach is based on big data technology, works faster and more complete than other methods, and gives current results. Innovatiespotter collects and finds relevant data about all the 2 million companies in the Netherlands. With this method, known and unknown companies are found in any innovation technology area, and the data help gain insight into their current activities and developments.
